

INSTALL GUIDE · REDMI WATCH 5 LITE

Manga Panel watch face

Thank you for your purchase! This guide gets the face onto your watch.

What's in your download

manga-panel-classic-ink.bin	Classic Ink colorway (black and red on paper white)
manga-panel-sakura.bin	Sakura colorway (pink)
manga-panel-neon-night.bin	Neon Night colorway (dark, saves the most battery)
This guide	Install steps and help

Before you start

You need a **Redmi Watch 5 Lite**, an **Android phone**, and the watch updated to its latest software in the Mi Fitness app. iPhone is not supported. Installing a custom face doesn't change your health data, and you can switch back to any official face at any time.

Install steps

1. Download the files from your Etsy purchase (Etsy → You → Purchases and reviews → Download files) and save them on your Android phone.
2. Install the community version of the Mi Fitness app that supports custom faces. Where to get it: *see the link in the message I sent you with your order.*
3. Open the app and connect your Redmi Watch 5 Lite. Keep Bluetooth on and the watch close to the phone.

4. **SELLER: REPLACE THIS STEP** with the exact taps you used to load a .bin face onto your own watch, once you've tested it. Delete this box when done.

5. On the watch, press and hold the watch face (or go to Settings → Watch faces) and select Manga Panel.

Troubleshooting

"Not enough space"	Delete a face you don't use in the app's watch face manager, then try again. The watch holds only a few extra faces.
The install stops halfway	Keep the phone within 1 m of the watch, keep the app open on screen, and make sure the watch battery is above 20%.
Weather shows "--"	Turn on location and weather in Mi Fitness. The watch needs the phone connected to update weather.
Still stuck?	Message me on Etsy with your phone model and a screenshot. I reply to every buyer.

Manga Panel is original artwork. Personal use only; please don't resell or share the files. This is a fan-made face and is not affiliated with Xiaomi or Redmi.
